The Leader In High Performance Premium Braided Fishing Line

TUF-Line®

The most advanced braided fishing line on the market today!

Our original "salt and pepper" Line, TUF-Line is manufactured with Spectra® fibers and has an amazing 4% stretch which translates into super sensitivity and more powerful hook sets when compared to monofilament. TUF-Line is also hydrophobic, meaning it repels water and won't swell in diameter. TUF-Line is over 40% smaller in diameter than equivalent test monofilaments, which substantially reduces line drag.

Line Test	15	20	35	50	80	100	130	150	200
Diameter	.007"	.009"	.012"	.017"	.020"	.021"	.027"	.028"	.030"

Packed: 100, 150, 300, 600, 1200, 2500 yard spools.
Mill ends available.

TUF-Line Plus®

The newest wave in fishing line

Our 100% pure Spectra® Fiber fishing line, TUF-Line Plus is available in white or grass green. This super line has only 3% stretch giving you more powerful hook sets and more sensitivity than you could ever imagine. TUF-Line Plus is also hydrophobic and has excellent U.V. resistance which enables it to last up to four times longer than monofilament. TUF-Line Plus is also 50% smaller in diameter than equivalent test monofilaments.

Line Test	12	18	30	50	65	80	100	130	200
Diameter	.005"	.007"	.009"	.012"	.017"	.020"	.021"	.027"	.030"

Packed: 100, 150, 300, 600, 1200, 2500 yard spools.
Mill ends available.

Premium Quality Braided Line for fresh or salt water fishing

Western Filament, Inc., creators of the famous "W-40" lines has been producing quality braided lines for over 50 years. Designed by fisherman for fisherman, these high quality braided lines will capture the confidence of the most discriminating angler with prices to please everyone.

SuperCast

Thermally Enhanced Fishing Line

100% Spectra fiber fishing line, thermally enhanced with a unique hot coating process. The coating process adds additional body to the otherwise very flexible line that outperforms conventional braided lines. Longer casts, fewer rod tip wraps, improved knot holding performance, and better packing on the reel are just a few of the features that this casting line has to offer. When long casts and high abrasion resistance are needed, SuperCast is sure to be the line of choice.

Line Test	15	20	30	50	65	80	100	130	150
Diameter	.006"	.008"	.011"	.014"	.016"	.018"	.019"	.022"	.023"

Packed: 150, 300, 600, 2500 yard spools

DACRON®

The low stretch, premium quality braided line

Braided Dacron®

Ideal for trolling, casting and bottom fishing.

The highest quality Dacron® fibers and most advanced braiding machines in the industry are combined to manufacture this premium line. Its low stretch gives quick response to strikes and increases sensitivity. The spliceable construction and specially formulated wax eliminates strength loss from knots which reduces your chances of lost fish. Braided Dacron lines are available in a variety of lengths and pound tests all with I.G.F.A. approval.

Line Test	20	30	40	50	80	100	130	160	180	200	250
-----------	----	----	----	----	----	-----	-----	-----	-----	-----	-----

Packed: 150, 300, 600, 1200 and 2500 yard spools (20 through 100 lb. test)
150, 200, 600, 1200 yard spools (130 through 250 lb. test)

Braided Dacron® with Teflon®

For trolling, casting and bottom fishing.

This Premium Braided Dacron® fishing line has the added advantage of Teflon coating. This provides a smoother running, longer lasting line for off-shore or lake trolling, surf casting or bottom fishing. The reduced friction results in longer casts and easier line retrieval. It's available in a variety of lengths and pound tests.

Line Test	20	30	40	50	80	100	130	160	180	200	250
-----------	----	----	----	----	----	-----	-----	-----	-----	-----	-----

Packed: 150, 300, 600, 1200 and 2500 yard spools (20 through 100 lb. test)
150, 200, 600, 1200 yard spools (130 through 250 lb. test)

Braided Dacron[®] Flyline Backing

Western Filament is proud of our premium quality flyline backing. This small diameter, low stretch braided backing is waterproof and will not rot or mildew. Our flyline backing is available in 20 and 30 pound tests in white, chartreuse, and fluorescent orange.

Line Test	20	30
-----------	----	----

Packed: 100 and 2500 yard spools.

Braided Nylon Sturgeon Leader

This heavy duty shock leader was created for the angler who ties their own leaders. Manufactured with nylon multi-filament yarn, our sturgeon leader has excellent abrasion resistance and superior shock resistance. Sturgeon leader is available in three pound tests.

Line Test	54	72	96
-----------	----	----	----

Packed: 50 yard spools.

Lead Core Trolling Line

Tightly braided high tenacity Nylon multi-filament yarn encapsulates a 99.9% pure lead core. Our "pure" lead construction offers a smaller diameter than standard lead core lines. Color metering every 10 yards with a high visibility dye enables the angler to instantly determine depth. A must for every angler who needs extra weight for deep water trolling.

Line Test	12	15	18	27	36	45
-----------	----	----	----	----	----	----

Packed in 100 yard spools. Mill ends available on a first come first serve basis.

Slinky Drifter Cord

Braided high tenacity Nylon multi-filament yarn in an Olive Green color enable the angler to custom build soft, flexible, snag-proof weights. Perfect for heavy cover or rocky, fast water conditions. Three size ranges to accommodate every fishing condition.

Regular 32-1 .1875"	Magnum 32-2 .25"	Super Magnum 48-2 .375"
---------------------	------------------	-------------------------

Packed: 50 foot bags or 900 foot rolls.

Planer Board Line

High visibility, Fluorescent Orange braided Dacron line has the advantage of low stretch and long life. Smaller diameter than standard Planer Board Line allow the planer to run more smoothly with less line drag. Available in two pound tests for every fishing condition.

Line Test	130	200
-----------	-----	-----

Packed: 150 and 300 foot.

Braided Nylon Ice Fishing Line

Tightly braided nylon line impregnated with a Teflon® coating to ensure minimal moisture absorption. Nylon Ice line has a very high abrasion and shock resistance. The tightness of the braid provides a super smooth texture that is easy on hands and tackle but will resist freezing. Available in a variety of sizes to accommodate any fishing condition.

Line Test	15	20	25	30	40	50	60	80
-----------	----	----	----	----	----	----	----	----

Packed in 50, 100, and 150 yard spools. Color: Black

Braided Nylon Vinyl Coated Ice Line

A unique braided core is the foundation for this exceptional tip-up line. Unlike ordinary tip-up lines, our core is braided to ensure the longest life, smallest diameter, and highest abrasion resistance. The dense Vinyl coating ensures that the line remains soft and resistant to freezing even under the most frigid ice fishing conditions.

Line Test	15	20	30	50
-----------	----	----	----	----

Packed in 25 and 100 yard spools. Color: Black

Why Braided Line Rather Than The More Common Monofilament?

Western Filament's Braided line offers:

- ✓ Higher abrasion resistance
- ✓ Greater knot strength
- ✓ Will not curl or become entangled as easily
- ✓ Superior flexibility and limpness

Our superior quality braided lines boast all of the above qualities as well as the advantage of low stretch characteristics. Compared to the leading nylon monofilament, our braided lines have at least 50% less stretch. And we all know that less stretch means greater sensitivity to bites and immediate strike impact.

For over 50 years, Western Filament has been braiding fine fishing lines. Now Western Filament introduces a wide selection of premium quality braided lines suitable for the most discriminating angler.

These premium lines include:

- ✓ TUF-Line
- ✓ TUF-Line Plus
- ✓ Braided Dacron® for trolling and casting
- ✓ Teflon coated braided Dacron®
- ✓ Braided Dacron® Flyline backing
- ✓ Super Cast
- ✓ Braided Ice Lines
- ✓ Braided nylon Sturgeon leader

About Western Filament

Western Filament, Inc. was founded in 1938 as a manufacturer of fishing lines. For over fifty years the company has provided exceptional braided products utilizing high performance fibers such as Spectra®, Kevlar®, Nomex®, Ceramic, Fiberglass, Nylon, and Polyesters.

It takes approximately 200 hours at 13 yards per hour to make a bulk spool of TUF-Line Braided Fishing Line.

Centrally located, Western Filament has the ability to provide more responsive service to customers on both coasts. Our multi-million dollar manufacturing facility includes over 50,000 square feet of integrated industrial technology. Over 2,000 braiding machines, 500 twisting spindles, and a complete dyeing and packaging department produce braided material for the recreational, aerospace, and electrical industries. Western Filament's research and development lab is located on site and offers continuing reliable innovations in braided material. A state-of-the-art certified Total Quality Management system ensures customers unparalleled product quality.
